| 1. Part numbers do not have the traditional dash "-" symbols. In general, Aeronca parts follow a pattern of one number followed by a dash, followed by three, four or five more numbers. For example 7556R is 7-556R |                              |          |          |                           |          |
| 2. ** Prices are subject to change at anytime. These prices should be considered as an indication only. These are not firm prices or firm quotes.  |                              |          |          |                           |          |
| 3. Part numbers are believed to be accurate but Aero Fabricators, Inc does not guarantee the part numbers or descriptions are accurate. Please consult you Aeronca or Taylorcraft parts manuals to be sure.          |                              |          |          |                           |          |
| 4. Not all parts listed in this pricing list have been made by Aero Fabricators, Inc. Where possible, Aero Fabricators, Inc may be able to produce the part. Please request more information on your specific needs. |                              |          |          |                           |          |
| 5. Parts listed with an X are not finished products and are not approved parts.  |                              |          |          |                           |          |
| 6. Parts listed with a R or L at the end of the number designates Right hand or Left hand part.  |                              |          |          |                           |          |
